PNEUTECH®
SINCE 2006

STRIVING FOR EXCELLENCE

Three words that change how we think, create and produce: Form Follows Function. It is a principle that equates to a revolution. No form and no function can be considered in isolation. Not ending the developmental process until there's nothing left to be added or removed. Until the product is more than the combination of form and function. With this aspiration in mind, we develop, design and produce faucets, showers and accessories. For bathrooms and kitchens. Pioneering innovations with luxury.

GET INSPIRED BY PNEU TECH

BE INSPIRED!

FOR THIS EDITION OF OUR CATALOGUE WE
WANTED TO TAKE YOU ON A JOURNEY
THROUGH ALL OUR INNOVATIVE PRODUCTS.
CRAFTED FROM OUR DEEP EXPERIENCE,
CREATIVITY AND MARKET SUGGESTIONS.

WE WANT TO TAKE YOU BY THE HAND, AND
SHARE WITH YOU OUR CREATIVE PROCESS,
EXPLORE THE BOUNDARIES OF OUR
IMAGINATION.

A DEEP SEA OF PLACES, FACES, IDEAS. A SET OF
CHOICES, OF CONNECTIONS, FROM WHICH
FINALLY EMERGES A UNIQUE AND PARTICULAR
HORIZON: OUR OWN.

IMMERSE YOURSELF IN OUR WORLD OF
PNEUTECH.

OUR ASPIRATIONS

We want to delight our customers with innovative system solutions for bathrooms featuring professional design, top quality and great user benefits. We want to be the most appealing and preferred supplier, and achieve an internationally significant market position through excellence and dependability, particularly when it comes to customer service. We want to achieve profitable growth and sustainable stability for the company by delivering gratifying customer experience.

PRODUCTION PROCESS

In the most recent years we have been undertaking a process of corporate transformation, adapting the production according to the principles of lean production and, more generally, of lean thinking. The objective is to improve production performance, optimizing working times and methods. Not only that, in line with the eco-friendly mission that has characterized the company since its creation, we have started a digitalization work to eliminate 100% paper documents, both in the production and commercial departments.

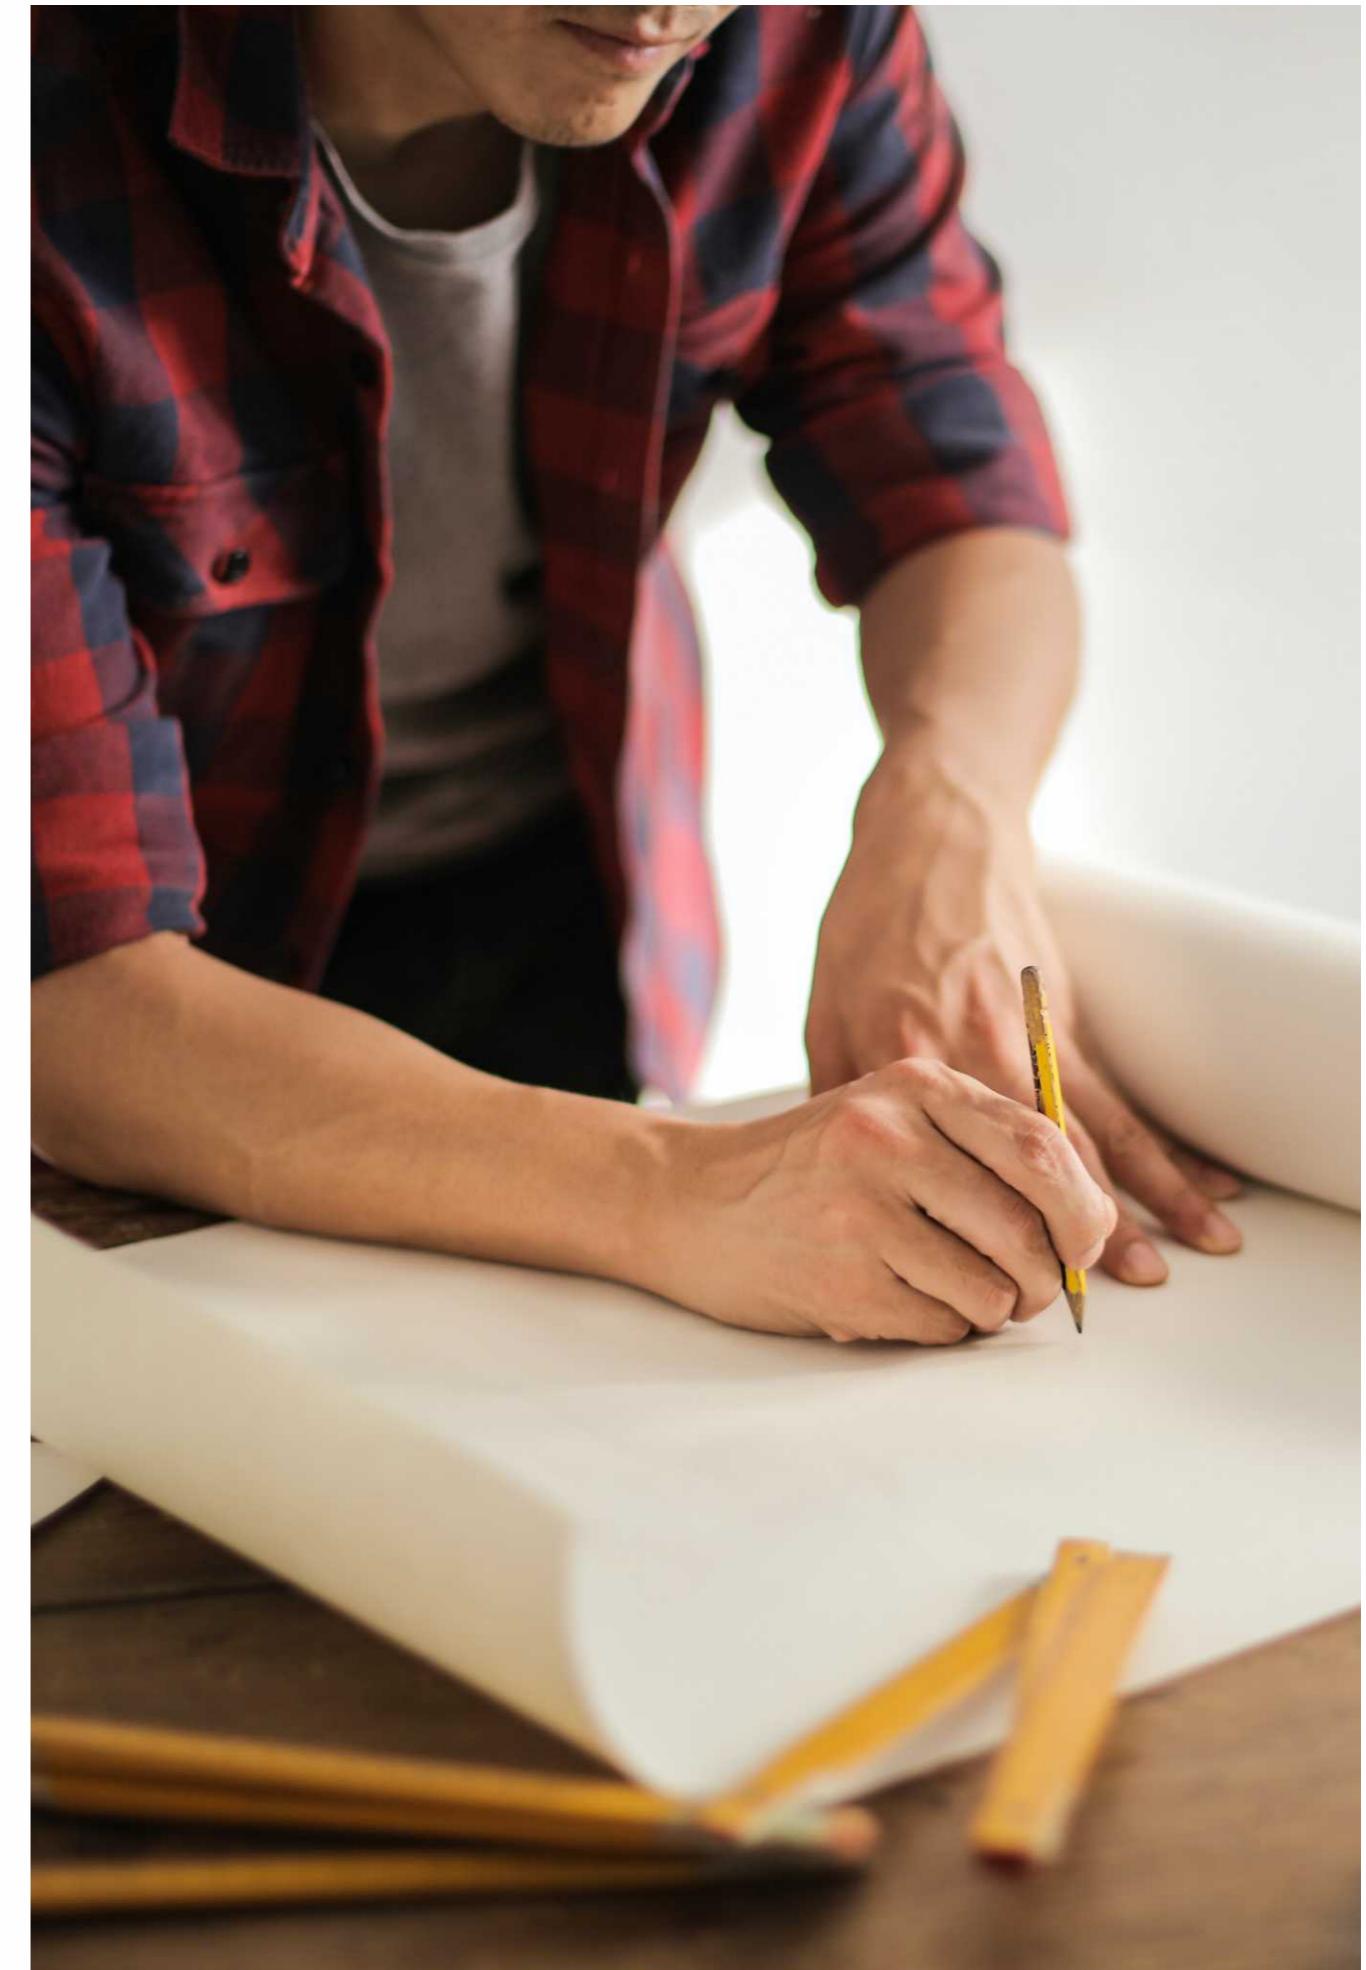

1. DESIGN

Our products are born from ideas, wit and mastery of our Team. Every single production cycle is checked and analyzed in detail. In the design and planning phase, the style office analyzes both shapes and materials the tap will be manufactured with. In the technical office the product is engineered through the use of 3D software.

2. PROTOTYPING

It consists of the creation of wooden prototypes by master craftsmen. This passage allows to check their shapes and ergonomics. Once approved, the product can be industrially manufactured.

3. **CORE AND SHELLS CREATION**

During this phase the raw bodies of our faucets are obtained by carrying out all the related activities. The process concerns the creation of so-called cores that will be used to get the holes in the fusion, that are the parts that must not be filled by the liquid metal (cast brass). The cores are made of earth and sand mixed with agglomerates obtained by a negative mold called core box.

4. **FOUNDRY, CASTING PROCESS**

The molten metal (1000°) is stripped from the furnace, collected in a ladle and poured into the metal die through the casting channel. Once solidified and cooled, we extract our raw faucets from the die and with a vibration process the core crumbles into sand to get the channels where water will flow.

5. **TRANSFER TURNERY**

Industrial production process, for different mechanical machining, obtained by chip removal. Turnery is defined by a rotary piece motion and a mostly straight tool movement (in milling and drilling the tool has instead a rotary motion).

6. **CLEANING / FROSTING**

Metal working processes that prepare the activities for real metal work such as nickel plating, chrome plating and gilding. This result is obtained by means of very fine and uniform abrasives that reduce the sizes of the surface roughness.

7. **POLISHING**

Purpose of the polishing process is to file the microscopic irregularities of the body so as to make the treated surfaces as smooth as possible, so that the light reflection becomes more uniform.

8. **CHROME- PLATING**

Chrome-plating involves the immersion of the faucet body to be chromed in a series of basins. In a first series of these ones the piece is degreased and cleaned. The main basin (where the piece stays longer) is that of the electrolytic nickel solution. Before carrying chrome, it is crucial to create a layer of nickel to uniform the metal surface as microscopically as possible.

SALT SPRAY TESTED G-85: 96+ HOURS

COMPARISON

VS

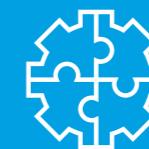

WITH TIME OTHER'S PLATING/COATING MATERIAL GETS PILLED OFF IN DAILY USE.

CENTION COLOR HAS BEEN TESTED FOR LONG LASTING USE.

10. ASSEMBLY AND TESTING

Process dedicated to the operations necessary to join the various parts, pre-assembled or individual of the faucets.

11. QUALITY CONTROL

Taking note of the individual parts that will constitute the entire faucet so that they have no defects, to guarantee quality and resistance to a product aimed at satisfying the end customer.

12. PACKAGING

The finished and controlled product equipped with warranty certificate is packaged. Our packages are drop tested to ensure safety of the product during transportation.

Painting is self-discovery.
Every good artist paints what he is.

- Jackson Pollock

MAPLE

The maple is a common symbol of strength and endurance and has been chosen as the national tree of Canada. Maple leaves are traditionally an important part of Canadian Forces military regalia. The first attested use of the word was in 1260 as "mapole", and it also appears a century later in Geoffrey Chaucer's Canterbury Tales, spelled as "mapul".

NIOBE

"Niobe" is inspired from One of the finest Clematis ever produced! With free-flowering, ruby-red blooms accented by golden-yellow stamens, this variety is a truly regal specimen! Perfect for fences, mailboxes, lamp posts, or any decorative support. Plant in moist, well-drained soil, protect from strong winds and keep roots cool by mulching.

POPLAR

Poplars of the cottonwood section are often wetlands or riparian trees. The aspens are among the most important boreal broadleaf trees. Poplar was the most common wood used in Italy for panel paintings; the Mona Lisa and most famous early renaissance Italian paintings are on poplar. The wood is generally white, often with a slightly yellowish colour.

ROWAN

The Rowan is steeped in folklore and was seen very much as a tree of protection. These fell to earth where each of them turned into a rowan tree. Hence the rowan derived the shape of its leaves from the eagle's feathers and the appearance of its berries from the droplets of blood.

BROOM

The Plantagenet kings used common broom (known as *planta genista* in Latin) as an emblem and took their name from it. Wild broom is still common in dry habitats around Anjou, France. Brooms tolerate (and often thrive best in) poor soils and growing conditions. In cultivation they need little care, though they need good drainage and perform poorly on wet soils.

GENUS

Genus of flowering plants in the family Asparagaceae, subfamily Asperagoideae. It comprises up to 300 species. Most are evergreen long-lived perennial plants growing from the understory as lianas, bushes or climbing plants. The genus includes a variety of living forms, occurring from rainforest to semi-desert habitats; many are climbing plants. Most are dispersed by birds.

MORUS

Morus, a genus of flowering plants in the family Moraceae, consists of diverse species of deciduous trees commonly known as mulberries, growing wild and under cultivation in many temperate world regions.^{[1][2][3]} Generally, the plant has three main species ostensibly named for the fruit color of the best-known cultivar: white, red, and black mulberry (*Morus alba*, *rubra*, and *nigra*, respectively), with numerous cultivars, but more than 200 species are identified in taxonomy.

ASTER

The name Aster comes from the Ancient Greek word στήρ (astor), meaning "star", referring to the shape of the flower head. Many species and a variety of hybrids and varieties are popular as garden plants because of their attractive and colourful flowers. Aster is a genus of perennial flowering plants in the family Asteraceae. Its circumscription has been narrowed, and it now encompasses around 180 species, all but one of which are restricted to Eurasia; many species formerly in Aster are now in other genera of the tribe Astereae.

IVY

Hedera, commonly called ivy (plural ivies), is a genus of 12–15 species of evergreen climbing or ground-creeping woody plants in the family Araliaceae, native to western, central and southern Europe, Macaronesia, northwestern Africa and across central-southern Asia east to Japan and Taiwan. Like many other evergreen plants, which impressed European cultures by persisting through the winter, ivy has traditionally been imbued with a spiritual significance. It was brought into homes to drive out evil spirits.

CEDAR

Cedrus, common English name cedar, is a genus of coniferous trees in the plant family Pinaceae. They are native to the mountains of the western Himalayas and the Mediterranean region, occurring at altitudes of 1,500–3,200 m in the Himalayas and 1,000–2,200 m in the Mediterranean. Cedars are adapted to mountainous climates; in the Mediterranean, they receive winter precipitation, mainly as snow, and summer drought, while in the western Himalaya, they receive primarily summer monsoon rainfall and occasional winter snowfall.

ACCESSORIES

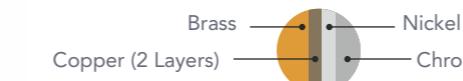

CP Lead Free Extension Nipple

As per NSF (National Sanitation Foundation) Lead is harmful to health, especially for children. It can harm central and peripheral nervous system, learning disabilities, shorter stature, impaired hearing, and impaired formation and function of blood cells. There are many more harmful effects. We are the first one in India to Introduce Lead Free Extension Nipples to improve healthy lifestyle and are environment friendly.

International Standard, Four Layer Coating for Long Lasting Sheen

The Nickel and chromium coating on our Extension Nipple is in accordance to British Standards service condition No. 2 & 3 defined for Kitchen/bathroom fixtures.

Crystal CP Extension Nipple

Art No.	Size	Price
EXC-2001	1"	INR 82 /-
EXC-2002	1 1/2"	INR 123 /-
EXC-2003	2"	INR 164 /-
EXC-2004	2 1/2"	INR 205 /-
EXC-2005	3"	INR 245 /-
EXC-2006	4"	INR 290 /-
EXC-2007	6"	INR 428 /-

Specifications

Material	: CP Brass Lead Free
Technique	: Extrusion
Type	: Nipple
Shape	: Equal
Head	: Round
Surface	: Chrome Plated
Water Pressure	: 1.2 Mpa
Thread	: Male/Female

CP Extension Nipple, Hex, Bush and Adapter

**Platinum

CBF-37002	Silver	INR 43 /-

CP Stainless Steel Flange

Art No.	Range	Price
CSF-37003	Silver	INR 14 /-

CP Stainless Steel Flange

Art No.	Range	Price
SFF-38001	Silver	INR 14 /-

WE WERE THE FIRST TO INTRODUCE DESIGN OF BIDET BOLTS WITH MORE GRIP, STABILITY AND LONG LASTING STRENGTH. THE DESIGN IS INDIGENOUS. DISCOVERED BY US WHICH FOLLOWS LEADERSHIP OF BIDET BOLTS IN THE MARKET

SS Bidet Bolt

With Fischer, Brass Nut & Brass Cap

RB-1004 Stainless Steel EWC Rack Bolt 5/8"

INR 479/-

Specifications

Strength	: Bear up-to 1200kg
Size	: 16mm (5/8")

With Fischer, Brass Nut & Brass Cap

RB-1007 Stainless Steel Bidet Bolt 12x16mm

INR 451/-

Specifications

Strength	: Bear up-to 1200kg
Size	: 12mm (1/2")

With Fischer & Brass Cap

RB-1005 Stainless Steel Wash Basin 3/8"

INR 170/-

Specifications

Strength	: Bear up-to 300kg
Size	: 10mm (3/8")

MS Bidet Bolts and Fixing Accessories

With Fischer & Brass Cap

With Fischer

RB-1001 CP Mild Steel EWC Rack Bolt 5/8"

INR 345/-

Specifications

Strength	: Bear up-to 1200kg
Size	: 16mm (5/8")

Brass Screw (with Show Flange for EWC) Pair

Art No.	Size	Price
BS-36001	3"	INR 62/-
BS-36002	4"	INR 76/-

With Fischer

RB-1002 Mild Steel Wash Basin Bolt 3/8"

INR 54/-

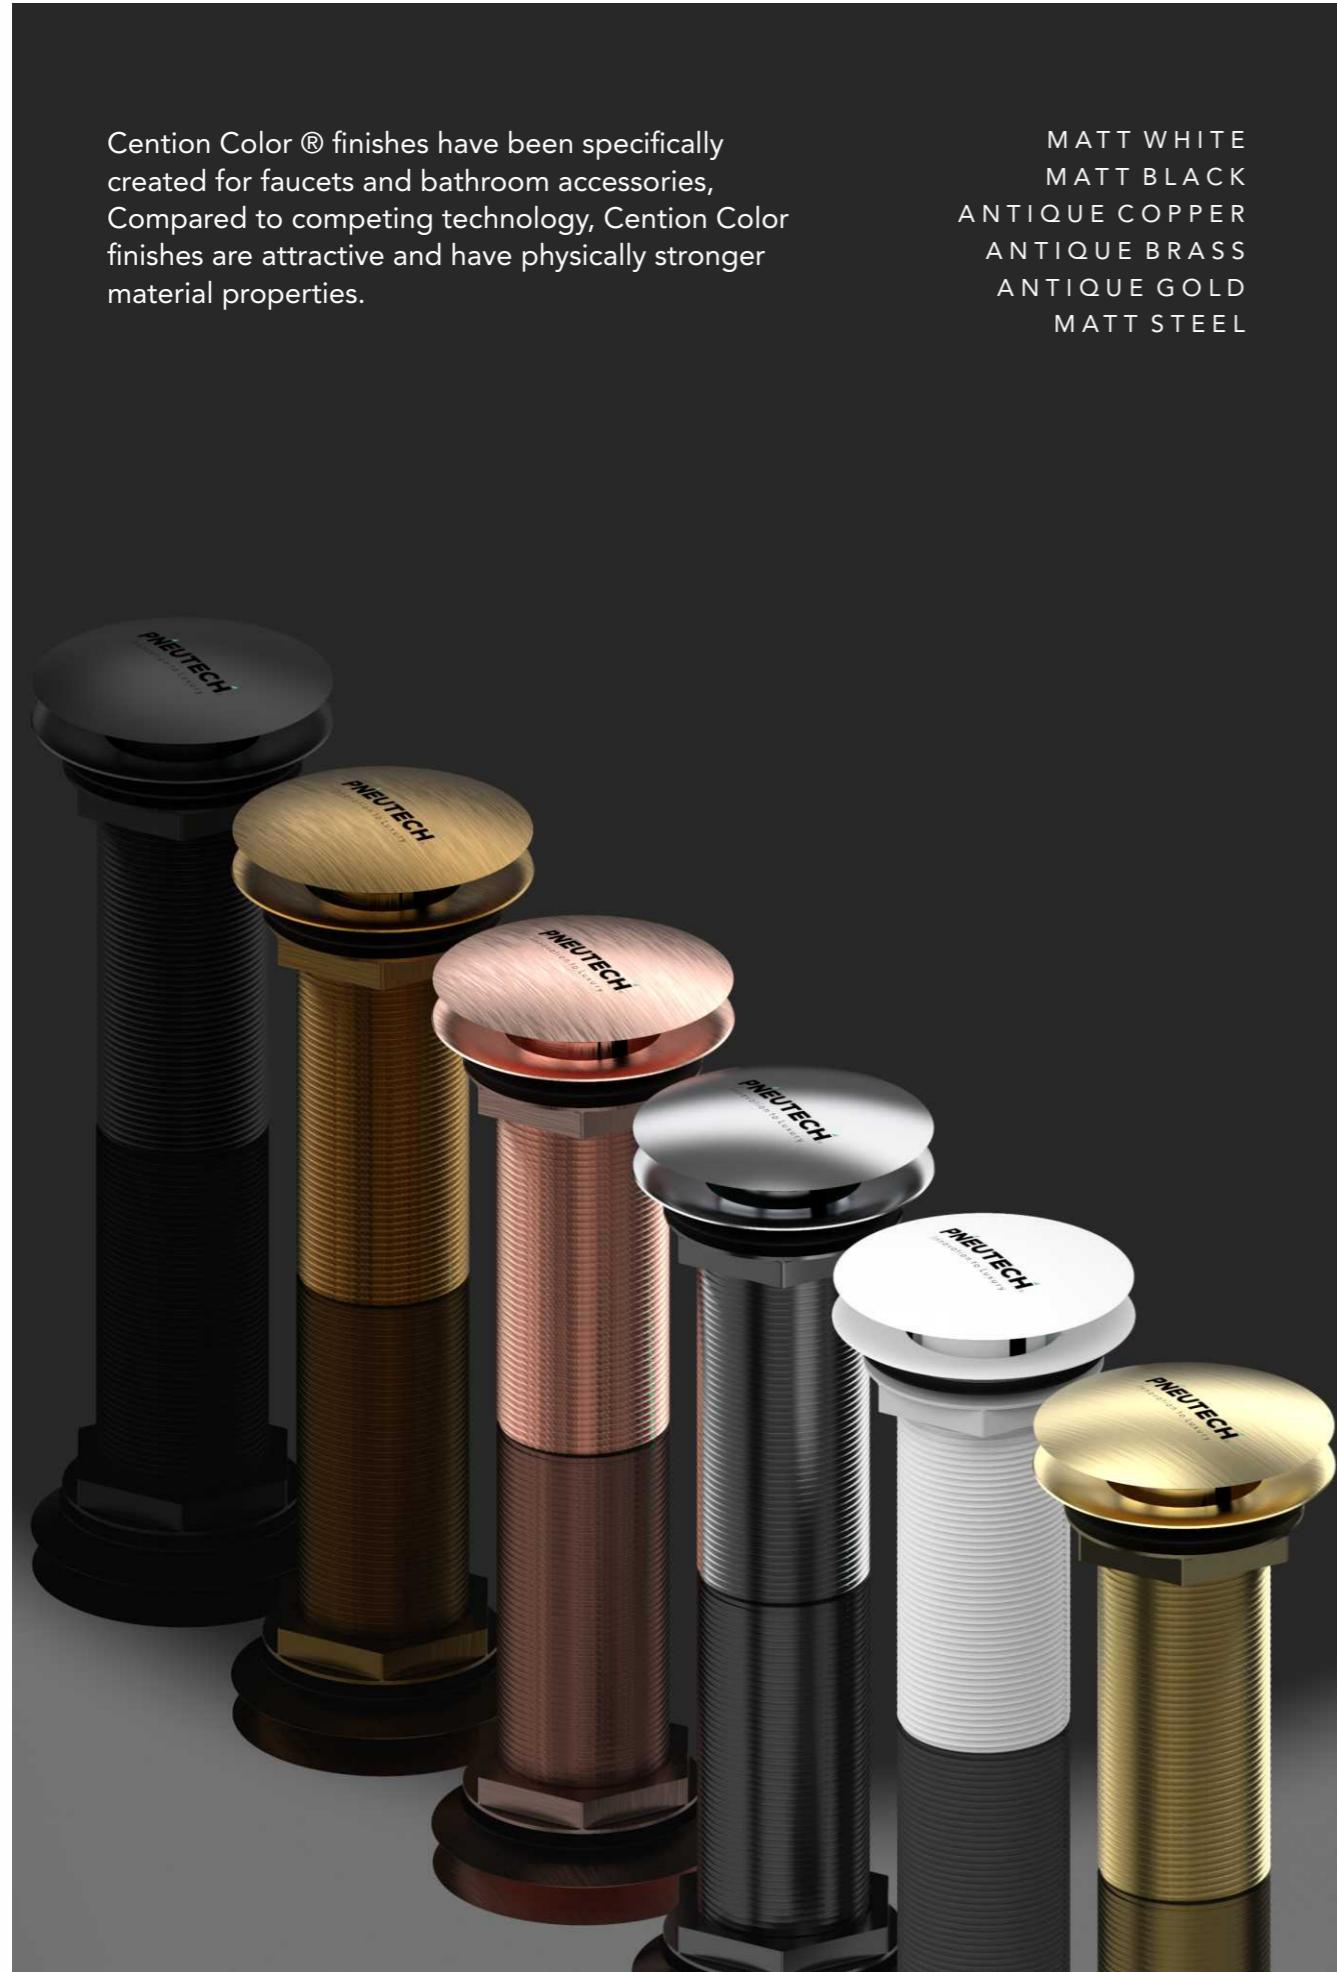

Specifications

Strength	: Bear up-to 300kg
Size	: 10mm (3/8")

Urinal & Corner Basin Bracket UB-5001

INR 85/-

Cention Color ® finishes have been specifically created for faucets and bathroom accessories, Compared to competing technology, Cention Color finishes are attractive and have physically stronger material properties.

CP Waste Couplings and Sink Couplers

**CP Waste Coupling Silver
(Full/Half Thread)**

Art No.	Price
WCS-4001-F	INR 214 /-
WCS-4002-H	INR 214 /-

**CP Waste Coupling Gold
(Full/Half Thread)**

Art No.	Price
WCG-4003-F	INR 260 /-
WCG-4004-H	INR 260 /-

Stainless Steel Waste Coupling

Art No.	Price
WCSS-4005	INR 103 /-

CP Waste Coupling Long Thread

Art No.	Price
WCL-4006	INR 410 /-

CP Urinal Waste Coupling Doom

Art No.	Price
WCD-4012	INR 353 /-

CP Popup Waste Coupling (Full Cover)

Art No.	Size	Price
WCP-4007A	3"	INR 494 /-
WCP-4007B	5"	INR 555 /-

Sink Waste Coupler Medium

Art No.	Price
SWC-4009	INR 149 /-

SS Sink Waste Coupler

Art No.	Price
SWC-4010	INR 255 /-

Bottle Traps, Connections and Waste Pipes

CP New Bottle Trap

Art No.	Price
BT-9001	INR 1066 /-

CP Bottle Trap Pipe

Art No.	Size	Price	Art No.	Size	Price
BTP-9001	7"	INR 167 /-	BTP-9004	15"	INR 294 /-

INR 98 /-

PVC Flexible Waste Pipe
FWP-6002

INR 36 /-

CP Spreaders and Fixing Accessories

CP Urinal Spreader
CUS-12001

INR 337 /-

CP Urinal Spreader Sleek
CUSS-12002

INR 471 /-

CP Urinal Spreader Parry
CUSP-12003

INR 375 /-

CP Clutch (For Hand Shower Attachment)
CPC-33001

INR 334 /-

CP Conversion Mixer Bend
CMB-30001

INR 330 /-

Brass Wall Mixer Legs (with Flange)
WML-31001

INR 316 /-

PT.F.E Thread Seal Tape (Yellow)
TST-10001

INR 18 /-

Polytetrafluoroethylene (PTFE) film use in sealing pipe threads. The quality of any PTFE tape. MIL-T-27730. A thickness of 3.5 mils and a minimum PTFE purity of 99%. Tape is typically wrapped three times around the pipe threads to ensure a tight seal and to prevent leaks.

Nitric Rubber Gasket
RB-11001

INR 79 /-

Gratings Stainless Steel 202 Grade

Grating SS Plain Round

Art No.	Size	Price
GPR-49001 WH	5"	INR 42 /-
GPR-49002 WOH	5"	INR 42 /-

Grating SS Plain Square

Art No.	Size	Price
